Course Grading

60%: Homework

- Released weekly on Thursdays and due on Sunday a week later;
- 14 weeks in total; no late days but you can skip two.
- Each submission is worth 5% of the final grade (12 x 5% = 60%).

40%: Project presentation

- Group project;
- Details to be released in the middle of the semester;
- Final presentation in Week 16.

Syllabus

Week 1	9.16	Introduction	Week 9	11.11	AI for social good
Week 2	9.23	Theory overview	Week 10	11.18	Vision

Week 4	10.7	No lecture	Week 12	12.2	Machine learning
Week 5	10.14	AI overview	Week 13	12.9	Graphics
Week 6	10.21	Quantum overview	Week 14	12.16	Robotics
Week 7	10.28	Embodied AI	Week 15	12.23	AI for science
Week 8	11.4	TBD	Week 16	12.30	Project day

Office Hour

We hold an **Office Hour (11:30am to 12:30pm)** after each weekly lecture.

We will provide **introductory tutorials for useful CS skills** during Office Hours. We strongly encourage everyone, especially students without a CS background, to attend.

Attending Office Hours is **optional**, and it will **not** count toward your course grade.

Office Hour

Tutorials to be covered during Office Hours:

- Tool use: LaTeX, shells, Python, cloud servers, Git, ...
- How to read papers, make posters, and give talks;
- Responsible use of large language models (LLMs) in your studies;
- Basic privacy and security practices.
